Trauma Informed Care and Adverse Childhood Experiences

Tuesday, May 5, 2015 • 8:30 a.m. - 4 p.m.

Description

Trauma Informed Care is an organizational structure and treatment framework that involves understanding, recognizing, and responding to the effects of all types of trauma. Trauma Informed Care also emphasizes physical, psychological and emotional safety for both consumers and providers, and helps survivors rebuild a sense of control and empowerment.

This training is an opportunity to assist educators, families, caregivers and other social service providers in fostering greater understanding of trauma informed care and child traumatic stress, help providers understand the effects that trauma can have on child development, behaviors, and functioning, as well as recognize, prevent and cope with compassion fatigue.

Featuring keynote speaker:

Dr. Dipesh Navsaria
Toxic Stress and Childhood Adversity in Early Brain Development

Dr. Dipesh Navsaria will present on the science behind toxic stress in early childhood and its effects on developing brain architecture that can lead to lifelong problems in learning, behavior, and both physical and mental health.

Dipesh Navsaria, MPH, MSLIS, MD is an assistant professor of pediatrics at the University of Wisconsin School of Medicine and Public Health. He practices primary care pediatrics at Access Community Health Center. He is also the founder and director of the Pediatric Early Literacy Projects at the University of Wisconsin, and is also the founding medical director of Reach Out and Read Wisconsin.
