# Video Tools You Should Be Using in the Classroom

June 17, 2015 • 9 a.m. - 3 p.m.

**Presenters: Ben Hommerding and Kurt Wismer**

## Description

If you have been thinking about how to integrate video into your class or school, this is the session for you. We will discuss and create videos using Google Hangouts, YouTube, and WeVideo. You will also learn about free Teleprompters that work on Chromebooks!

Once familiar with the tools, you will learn about how we created a video network at Winneconne and North Fond du Lac using YouTube including, daily announcements, weekly shows, student projects, district projects, live broadcasts of elementary book shares, and live broadcasts of some school sports (we even have commentators!). Most of the tools we have used are free and available to everyone!

Come learn about video creation in a collaborative session that will help jumpstart you and your school with video production!

**NOTE:** Attendees are encouraged to bring a computer (Chromebook, Windows or Mac is just fine). It would also be beneficial to bring some video clips with you that you might want to use to create a video about you or your class. We will have some camera's on hand to learn how to properly film, but a smartphone will work too.

## About the Trainers

Kurt is a Google Certified Teacher and Trainer. As a Business, Marketing and IT teacher at Shiocton School District, Kurt uses technology throughout his curriculum to create durable learning experiences for his students that are both rigorous and transformative as they prepare for their careers and continued education. Kurt is part of the technology team at Shiocton that has lead the school to a 1:1 environment and has provided considerable training and support in that initiative. Kurt is just finishing his master's degree at UW-Stout in Career and Technical Education.

Ben is a teacher and Technology Innovationist (Tech Coach) and coach in the Winneconne Community School District. He teaches high school students in App Design and a course called TIPS. TIPS is a pilot course where students will leverage the power of Google Apps, and their online based technologies to create weekly newscasts, promotional videos and commercials, design applications, and work with the school, district, and community to provide technology based problem solving services. Ben uses 20% time and the power of inquiry based learning to push his students to new heights. He hopes to create a model for this type of learning that any classroom, school or district can adopt to create schools that truly prepare their students for the future. Ben is a

Google Apps Certified Trainer and Google Certified Teacher, and a Glass Explorer.

**Who should attend?** This is intended for beginner and intermediate users.

K-12 Regular and Special Education Teachers, District Administrators, Directors of Curriculum and Instruction,
