LEGO Mindstorms are an innovative tool to introduce students to the engineering design process, coding, and programming. CESA #4 offers a one-day training for educators that want to incorporate STEM into all aspects of instruction through the use of the Mindstorms. Whether your district has their own Mindstorm kits or you borrow some of CESA #4's 45 kits, walk away from our training with tools, ideas, and basic understanding of coding and programming on the "LEGO Brick", the LEGO software, or iPad or Chromebook Lego App. Educators will learn engage in the four different levels of the robotics process, and participate in various LEGO challenges. Registration and training includes priority access to the checkout CESA 4's LEGO Mindstorm kits to use immediately with students in the classroom.
