February 20, 2018 *Principal Networking Webinar*

OVERVIEW

The educational leader is one of the most crucial roles for sustaining growth and improvement in schools. Adding to the challenge of leadership is our region's predominantly rural and isolated nature. This format will allow building leaders to network with colleagues in the CESA#12 region around state, regional and local issues of concern, as well as timely topics related to school improvement. The Network facilitators will provide resources to help nurture, develop and sustain educational leaders in our region. The Principal Network is an opportunity for school principals to come together and support each other's growth in their individual districts and across our region.
