

Practical Principles of PLCs for New Teachers

*Thursday, September 20, 2018
9:00 a.m. - 3:00 p.m.*

Brand new teachers or teachers new to PLC districts will learn the practical application of PLC principles as related to unit planning. We will focus first on general principles of a true PLC; we will then dive into using standards to plan units, create formative/summative assessments from unpacked standards, gauge depth of knowledge-proficiency-prerequisites of learning targets, and strategize ways to use formative assessment data to meet the needs of all learners in a collaborative environment.

- *Teachers should come equipped with their academic standards (essential learning outcomes or guarantees if the district has them) as well as an electronic device to use.*
- *Teachers attending will walk away with at least one unit planned, assessments chosen/created/revised, and a plan of action to ensure learning for all.*

Registration: visit myQuickReg

Event Cost: \$150 per person
