

# STUDENT GAME CREATION FIELD DAY

October 2nd, 2018

9:00AM-2:00PM

Area Gifted and Talented students are invited to participate in an ARIS Field Day at CESA 4! Students will be learning about technology, engineering, and coding to build an interactive story, tour, or game. They will have the opportunity to complete quests, collect items, and talk to virtual characters, all while exploring the world around them.

This learning opportunity connects to the core curriculum in schools by providing teachers with the resources and tools necessary to differentiate instruction in the core curriculum. Event activities are aligned to Wisconsin State English Language Arts, Science, Computer Science, and/or Information Technology Literacy Standards.

An iPad AND a Chromebook will be needed for every TWO students with both Siffr and ARIS installed PRIOR to coming, as they will use both throughout the day.

This event is **FREE** for MVGTN members and \$150.00 for non-member districts.

Teams to include up to 4 students and 1 adult advisor.
