ACP Community of Practice

The easy way for school districts to get answers for common ACP challenges!

Third Wednesday each month @ 3:30 p.m. BONUS Xello sessions on most first Wednesdays!

Start the Year Strong!
Provide your students with a vibrant ACP process

Join a new virtual ACP Community of Practice* that will focus on a different ACP topic every month. Choose only the topics you need! Here's what you'll gain every month:

- Expertise with leaders or peers who will share their ACP experiences and strategies

- Resources to help you put your learning into practice

- Follow-up support sessions with your CESA ACP Coordinator so local school districts can share best practices and brainstorm challenges together
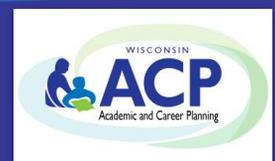

All sessions will be recorded so you can participate synchronously or asynchronously. Calendar on next page.

ACP gives students what they need for success – and that is especially critical right now

- When students choose courses that align to their career interests, their **sense of belonging and engagement** in learning increases.

- Career exploration helps students find the **relevance** in their classes and increases **academic motivation**. These are ESSENTIAL when learning takes place in virtual or blended environments.

- ACP provides students with access to the **guidance and support** they need when they need it. It ensures that ALL students have a plan for success after high school.

- ACP helps students to be **better equipped to succeed**, even in a recession when opportunities become more scarce.
