T/ES Calibration: Focus on the Summative

Are evaluators using phrases such as “as evidenced by” or “observed through”? This training allows evaluators to calibrate to maintain rater reliability and objectivity and use coaching to guide educator growth. We encourage districts to attend as a team or have their liaison come to them to facilitate rater reliability within the administrative team.

Per state requirements, evaluators of teachers must complete the Effectiveness Project® evaluator certification requirements prior to using the Effectiveness Project evaluation model and recalibrate every semester. This workshop fulfills the recalibration requirement.

Who should attend?

Evaluators of teachers and educational specialists
