

Join Stephanie Harvey for Using the Inquiry Framework in a Student-Centered Classroom

March 18 and 19, 2015

8:30 AM-3:00 PM @ CESA 3

Turn your classroom into a student-centered mecca where there are more questions than answers. Learn about increasing the amount of non-fiction text your students read, using inquiry circles to increase rigor, and getting your students motivated to learn. Perfect for 3-8 teachers, special educators and administrators.

Important Note: Many components of the Inquiry Framework are described as “Distinguished” on the Educator Effectiveness Teacher Practice Rubric. In addition, Smarter Balanced Assessment items require the kind of thinking fostered by inquiry. Register now to reserve your spot:

Teachers who use the Inquiry Framework say: “There is more student-choice.” “It Increased their independence.” “It really makes me think about how I word things with my students.” “I need to let them do the thinking.” “It really meets the Common Core.” “It’s just another way for them to express their learning.” “It gets rid of regular worksheets.” “They are so motivated!”
