## Using the Reports in ISES

The Individual Student Enrollment System (ISES) includes student demographic and outcome data needed to meet the ESEA report card requirements at the state, district, and school levels. While this is often simple data entry, coding errors can negatively impact your school report cards and testing results. It is essential to manually verify ISES data!

### Presenter:

Kari Krakow works in the technology side of CESA 5. Having been with the agency for nearly eight years she has become the go-to person in Wisconsin for State Reporting.

### Target Audience:

Designed for administrators and ISES data entry personnel, this training will provide you with better ways to enter and manage essential student data for accuracy! Bring your laptops, logins and questions.
