

Exploring Free Online Tools for Progress Monitoring

Progress monitoring of student growth is essential to making accurate decisions regarding your students' education—especially when it comes to not only monitoring progress of IEP goals but also overall instructional learning objectives.

Have you been looking for a way to consolidate your method of collecting student data, formatively checking “what they know” and avoid spending hours analyzing the numbers?

Learn how to use online tools such as Google Forms, WuFoo and others to create powerful progress monitoring and formative classroom assessment tools that can be individualized to any one of your students!

Does your district purchase and use SEEDS4Schools?!

There will also be updates for the new Progress Monitoring tool built right into the system!

Tuesday, January 27, 2015
