Making the Most of Google Apps (Basic)
9:00am-3:00pm (Registration begins 8:30am)
Discovery Room

New to Google Apps for Education? Or just looking for a refresher and some new ideas for leveraging this robust digital tools suite?

Google is much more than a powerful search engine. Among all the web-based tools out there, Google Apps for Education offers a multitude of user-friendly tools for everyone: administrators, educators and students alike. In this workshop, participants will review and explore beyond Gmail, Google Calendar and Google Docs into tips, tricks and tools that can help optimize student engagement and achievement as well as enhance overall professional efficiency. This workshop will also offer time for networking with other Googlers to glean from their Google Apps experiences!

Intro to Google Tools: Best Features for Busy Teachers!
9:00am-3:00pm (Registration begins 8:30am)
Room TBD

Google is so much more than just a search engine!

With all the web-based tools out there, it can be hard for teachers to know which ones will work best. Google has made that choice easier by creating some very powerful and FREE web tools! Whether you are teaching Spanish or Social Studies, mathematics or music, there's a free Google feature to make your lessons more dynamic and your projects more organized. Some of the most useful classroom tools will be introduced as well as classroom activities to go along with the tools. While this workshop will cover a multitude of offerings, their importance will be considered from two frames: how do they help students learn AND how will they save teachers time. Concrete examples of how to implement these tools in activities will go hand-in-hand with suggestions on how to use the tools to build professional collaboration.

"Google Does What…? "
Maximizing Google Apps for Student Learning (Advanced)
9:00am-3:00pm (Registration begins 8:30am)
Discovery Room

Google Apps for Education offers a myriad of applications to teachers and students to maximize student learning and instructional effectiveness...so how do we understand the potential?

This workshop will allow participants to navigate through GAFE beyond Gmail, Google Calendar and Google Drive into Blogger, Google Classroom, Scholar, Power Searching and many more advanced tools within Google Drive. We will also explore Google Chrome Apps and Extensions to best differentiate for all learners and build capacity in students to personalize their Chrome browsers for optimal learning and productivity.

$150.00 per participant per workshop
(includes materials, breakfast and lunch)

Graduate credit through Viterbo University available upon receipt of additional registration and $200.00 the day of the workshop

Documented Professional Development hours available upon request
