All juniors in Wisconsin will take the WorkKeys Assessment on March 4. ACT WorkKeys is a job skills assessment system that helps employers select, hire, train, develop and retain a high-performance workforce. Our students will take assessments in the areas of Applied Math, Locating Information, and Reading for Information. Attend this workshop to explore ways CTE and other teachers can support student success on the WorkKeys assessments. Participants will review practice tests and analyze learning targets, and should bring or have access to your content standards and curriculum.

Workshop Objectives

- ◆ Review the three WorkKeys assessments: Applied Mathematics, Locating Information and Reading for Information
- ◆ Analyze curriculum and content standards and work with colleagues to develop and/or incorporate activities and performance tasks that support WorkKeys assessments and improve student college and career readiness
