Educational Environments Codes Training

The preschool, ages 3-5, educational environmental categories for children attending a regular early childhood program have changed. The categories A_1, A_2, and A_3 can no longer be used and are replaced by four new categories (R_1, R_2, R_3 and R_4). These changes will impact Fall 2010 ISES reporting. As a result, districts will need to identify and reclassify any children currently assigned to A_1, A_2, or A_3 who will be age 3, 4, or 5 on the October 1 Child Count. Join us for an interactive presentation on preschool environment codes and accurate reporting practices. Please note there will be time for questions and answers during the presentation.

WHEN:
Tuesday, Sept. 7, 2010
1:00—3:00 pm
CESA #5 (via polycom)

AUDIENCE:
Directors of Special Education, School Psychologists and anyone who classifies and reports environment codes.
