Training Description:

The Student Services/Prevention and Wellness Team has developed a toolkit to help schools respond to mental health issues among students. The toolkit includes background information, a unit of instruction for health education classes, and a system for pupil services staff to work with educators to reduce the barriers presented by mental illness. Action planning is integrated into the day. A complete copy of the toolkit is provided on a CD. The toolkit was developed by educators and mental health professionals, and has been through multiple reviews and piloting.

The training is intended for school teams, and is most effective when health educators, pupil services, and administrators come prepared for action planning in their school or district. The toolkit is applicable in elementary, middle, and high school levels. The classroom curriculum is intended for students in grades 8-10. The activities are used as learning opportunities for the adults in our full-day workshop. Parents and community mental health providers are also welcome to attend.

Please Note: *This is Part II of a two-part training.*

Part I is being offered on December 14, 2010 and focuses on the problem and intervention.
