Tracy Hogden
thogden@cesa4.k12.wi.us
608-786-4850

Have you heard about the research behind the power of video modeling to support student success? Participants will learn how to create, edit and use video to empower students, and teach the skills they need to be successful throughout their environments.

The Ipad showcase will allow participants to discover apps that can enhance the learning of their students. After demonstration and implementation ideas, time will be given to explore apps to increase student engagement and enhance their educational experience.

Register at www.myquickreg.com. For registration questions, please contact Becky Martin at bmartin@cesa4.k12.wi.us or 608-786-4832

Viterbo credit available for an additional \$200.00 to be paid on the day of the event.
