Implementing a Culturally Responsive Multi-Level System of Support

Improving Your Screening & Progress Monitoring Process

The Screening and Progress Monitoring training will increase the capacity of school teams in creating effective and collaborative processes to collect and analyze data within an RtI framework.

Who Should Attend

Teams of three or more, to include:

- Leadership staff, instructional staff, problem-solving team members, both general and special education teachers.
- Prior attendance at a WI RtI Foundational Overview/Framework Training is highly recommended.

Outcomes

Establish or improve your school-wide process for responding to student needs, including guidance to:

- Ensure screening and progress monitoring measures aligned to important outcomes and student need
- Establish decision rules for equitable problem-solving
- Use strategies to “dig deeper” into root causes
- Plan logistics
- Set goals and use data to evaluate the effectiveness of the school’s system of support at the individual and school level

What to Bring

Due to the interactive nature of this training, teams should bring:

- A laptop or tablet with wireless connectivity (*for some activities, it may be helpful for team members to have one-to-one access*).
- School teams are encouraged to bring a list of assessment tools currently used in the school/district for screening, digging deeper (diagnostic), and progress monitoring.
- If available, teams should bring copies of current data-based decision-making processes and/or decision rules used by collaborative teams in the school/district.

Cost \$130 per person. Includes registration breakfast, networking lunch, textbook and materials for both days.

Presenters Jill Koenitzer & Liz Gaebler, Wisconsin RtI Center Technical Assistance Coordinators
