

CESA 5 presents. . . .

INVESTIGATIONS TRAINING

Bring a team to one of our investigations workshops, scheduled in north and south locations throughout CESA 5. This training will engage participants in an active investigation of the organization, language and rigor of the newly adopted CCSS documents, giving them the foundation they need to examine and compare the new standards with district curriculum resources. These workshops are:

- Content Specific—Because the English/Language Arts and Math Common Core State Standards are so different, investigations workshops will be conducted in separate sessions.
- Appropriate for Elementary, Middle & HS—The day will be a mix of whole group and grade-span interactions. Be sure your district has representatives from all grade levels in attendance.
- Designed for Teams— Collaboration will be a big part of the day so it is important that you send more than one person, ideally elementary, middle school and high school staff.
- Train-the-Trainer Model—The participants in these workshops will have the tools they need to lead investigations of the CCSS in your district.

9 AM-3 PM
