

NFPA 70E TRAINING: ARE YOU DOING ENOUGH?

- Are you training your employees with the proper personal protective equipment (PPE)?
- Are your employees wearing the correct AR level of PPE to work on the hazard they are assigned?
- Have you had a formal arc flash assessment? If not, are your employees wearing the PPE per Table 130.7(C)(15) in the 2015 NFPA 70E code book?
- Is the correct meter being used? Is there a process in place to test the meter pre-use and post-use on different live sources?
- Do you have a formal glove program in place to test gloves on a six month basis? Do you test the gloves before each use?
- Have you conducted a review of your current lock out/tag out (LOTO) program?

If you answered “no” to any of these questions, than the Advanced Electrical Safe Work Practices - NFPA 70E workshop might be right for you. Join CESA 10 and Faith Technologies for this one-day workshop to help strengthen your electrical safe work practices, and ensure your workers go home to their loved ones each day.

ADVANCED ELECTRICAL SAFE WORK PRACTICES

TRAINING DETAILS

REGISTRATION FORM

WHY ATTEND?

The CESA 10 Advanced Electrical Safe Work Practices workshop will be cover the 2012 NFPA 70E code with an interactive course layout. Safety directors and maintenance personnel throughout the country have learned this code is quite complex.

The course is intended to assist those responsible for implementing safety within their workplace. The course will include several breakout sessions including discussion of challenges intended to build a stronger understanding of the intent of the code.

WHAT YOU SHOULD KNOW

OSHA has released the first changes to the electrical installation requirements in 25 years. The revised standard strengthens employee protections and adds consistency between OSHA's requirements and many state and local building codes which have adopted updated National Fire Protection Association (NFPA) and National Electrical Code (NEC) provisions.

We invite you to attend the **Advanced Electrical Safe Work Practices — NFPA 70E** training held by Faith Technologies on:

Thursday, February 11, 2016

CESA 6: Oshkosh, WI 54904

Thursday, February 18, 2016

CESA 10: Chippewa Falls, WI 54729

Registration begins at 8:00 a.m.

Training from 8:30 a.m. - 3:00 p.m.

TOPICS INCLUDE:

- A description of arc flash hazards
- An overview of NFPA 70E
- Arc flash case histories
- Personal protective clothing requirements
- Appropriate tools
- Required training
- Procedures for working on energized equipment
- Lock Out /Tag Out review and how to Tie Arc Flash goals with Lock Out /Tag Out

Register online from the CESA 10 website at www.myquickreg.com.

Or, complete and return the attached registration form with check no later than **two weeks prior to training date.**

CHECK PREFERENCE
