Digital Content Curation Day

Focus on Agriculture, Business and Information Technology, Health, Physical Education & Theater Arts

April 22, 2016
9:00 AM - 3:00 PM
CESA 2, 1221 Innovation Drive, Whitewater

The **WISELearn Digital Content Curation Project** is a state-wide project that aims to create an easy-to-use repository of high quality, standards-aligned digital resources that all Wisconsin educators can access to enhance their classroom instruction, and we need highly regarded educators to help with the process. The teachers will be paid a stipend for work outside of contract time for front-loaded professional learning, and districts will be reimbursed for the cost of subs for the face-to-face content curation workshop. Please join a growing number of Wisconsin educators sharing their content expertise.

This spring we are looking for a mix of 10-15 teachers at all grade levels from the following areas:

- **Agriculture**
- **Business and Information Technologies**
- **Health**
- **Physical Education**
- **Theater Arts**

If you are one of these educators, join us! IT'S FREE!

Participating curators will need to complete online training prior to the curation day. In order to receive a stipend for their time, curators are required to complete the following tasks:

1. **Complete online training modules before curation day (1-2 hours)**
2. **Bring 4-6 digital resources on curation day**
3. **Curate at least 1-2 digital resources during the curation event**

Curators will receive:

- $150 stipend for their time
- $25 in travel expenses
- $150 in sub pay to the district (invoiced directly to CESA 5)
