

# Preparing for WISE

WISEid

User Group Meeting  
**MARCH 3, 2016 9AM-3PM**

Join us for a day of training on how to successfully complete your district's reports to the DPI WISEid, ISES, and CWCS. These systems include student demographic and outcome data needed to meet the ESEA report card requirements at the state, district, and school levels. While this is often simple data entry, coding errors can negatively impact your school report cards and testing results.

**It is essential to verify your data!**

This training is designed for school data personnel, including: office administrative assistants, principals, and superintendents.

*\*Bring your laptops, logins, and questions!\**

Cost: \$75 for CESA 5 School Improvement Member Districts

\$150 All Others
