

# Educator Effectiveness

## SLOs for Evaluators - AM Session

9 am — Noon

In this model-neutral session, we will review the requirements of the SLO process and the purpose of SLOs. We will also discuss scoring of SLOs after considering both the process and the attainment of the goal. This will be an opportunity for leaders to share their ideas regarding scoring and around implementing a quality SLO process in their districts/schools.

## Re-Calibration - PM Session

12:30 pm — 2 pm

In the EE process, evaluators give formative feedback that is useful and specific to teachers, educational specialists, and school administrators. Once trained, evaluators need to calibrate twice annually to maintain rater-reliability and objectivity. This workshop will help to fulfill that requirement. Depending on registration, we will facilitate separate FOCUS and ELEVATE sessions.

Register Online for the **AM Session** by April 7, 2016:
