

Understanding and Learning

Student WISEid and WISEdata Basics

Districts are encouraged send participants to learn about the following:

- See the WISEid process. Including taking a file from your student information system, uploading to WISEid, working with matches, updating student data, reporting duplicates and downloading a file for import back into your student information system.
- Understand how to select your Student Information System in the Ed-Fi Credentialing tool.
- Learn how to review the data in WISEdata and make corrections.
- Learn about assigning WISEids
- Learn about the resources available to school districts to assist you with these new tools.
- Get an overview of the ASM role and how to assign roles.

Prior to coming, please ensure that upon logging into Secure Home, the attendee has access to the WISEid application, Ed-Fi Credentialing Application and WISEdata Application. If you do not have access, your District Application Security Manager (ASM) will need to give you access. Resources on how to do this can be found [HERE](#). Please note, Ed-Fi Credentialing and WISEdata tools are NOT YET available in ASM. They should be towards the end of August.

Date: September 23, 2016

Time: 9:00 am—12:00 PM

Cost: Free

Audience: Staff who are involved in WISEid and WISEdata reporting

Contact: Archie Barribeau, abarribeau@cesa9.org

Please register below by September 19, 2016
