

You Are Now Entering the Incubation Zone

The Space Where Ideas Grow

Join Jackie Drummer, Education Works! And Dorothy Ginnett, CESA 5 Curriculum Specialist for this workshop on creative thinking and teaching strategies. We will feature several creative idea incubation processes related to the Global Biomimicry Design Challenge on Climate Change (GT grant) and other creative STEM student team challenges:

- Generating problems and finding resources to pique the curiosities of student teams (idea generation)
- Sharing/processing what teams might have already done or are doing,(piggybacking ideas)
- Processing how to use invention/creative/critical thinking/decision-making skills to guide the team work (successful incubation tips)
- Processing next steps (planning)

Costs:

No cost for 2 GT Coordinators/Teacher team facilitators in GT Grant Participating Districts (Baraboo, Iola-Scandinavia, Princeton, Wautoma and Wild Rose).

All Others \$30

Jaquelyn Drummer, Education Works is a retired gifted and talented resource specialist with 44 years in the field. She has worked with educators and students in over 100 districts nationally, and is known for her creativity, practicality, and sense of humor.

Dorothy Ginnett, Ph. D. is the CESA 5 Science Curriculum Specialist and Gifted Education Grant Coordinator. Dorothy is also a wildlife ecologist and a science educator at the secondary level (WI Virtual School) and post-secondary level (Univ. of WI-Stevens Point).
