

Speech/Language Networking Meeting

What?

This is a networking meeting for Speech/Language Pathologists in the CESA 6 leadership districts. The purpose of these meetings is for SLPs to have the opportunity to ask questions and share information with colleagues about current trends and practices in speech/language. Many of you expressed interest in learning more about new apps for the Apple ipod/ipads which have opened doors for augmentative and alternative communication, vocabulary, and articulation intervention. New low-cost apps are emerging daily! These new apps for ipod/ipads allow us to provide augmentative and alternative communication for thousands of dollars less than the dedicated augmentative systems of the past. Join us for this session where Paula Walser will join us to look at the growing selection of apps for communication including: TapSpeak Button, iConverse, Proloquo2Go, ArtikPix, Locabulary, Speak It!, Dragon Dictation, Dragon Search, Picture Scheduler, Story Kit and much more!

Paula Walser, MS/CCC SLP has over 25 years of experience working with augmentative and alternative communication systems. As Director of E-Learning/Assistive technology, Paula provides leadership in the use of technology with ALL students. Paula was the statewide consultant for the Wisconsin Assistive Technology Initiative and is a frequent presenter at state and national conferences.

Join your peers for an afternoon of meaningful conversations and professional development!
