

High School Reform 2011-12

.....

In the past seven years, CESA 5 has developed a regional Professional Learning Community to build initiatives in high school reform. Eighteen high schools are now involved and significant progress is being made with a variety of reform initiatives underway.

The HSRC discussion group meets three times each school year. At all meetings, the participants share ideas, concerns, and solutions on the topic of 21st century education. In addition to those discussions, we bring in an outside resource to add new ideas and suggested solutions to our topics for the day.

.....
