

# Engaging Students in Learning and Assessment

January 26th, 2018

9:00 am - 2:00 pm

626 East Slifer Street

Portage, WI 53901

608-745-5400

Come learn and participate in strategies to prepare initial and professional educators, mentors, and administrators with the tools necessary to deeply engage students in their own learning, in order to achieve uncommon results both academically and personally in the classroom. The strategies presented are broadly embedded in the teacher practices sought in the Educator Effectiveness programs, are research-based and classroom-proven. Participants will learn the skills necessary to change the central focus of their classroom instruction from what is being taught to *what students are learning*.

This workshop is designed to be an extension of the WOW series but is open to any educator wanting to add to their toolbox of highly effective and fun strategies!

## Topics Include:

- Formative Assessment
- Literacy Across the Curriculum initiatives
- Differentiation of Instruction
- Response to Intervention

Cost: \$20 for CESA 5 School Improvement Members, \$75 all others

*This workshop will be repeated on 3/6/18.*
