#### Description:

CESA 2 is offering a book study facilitated by Karen Russell, Early Childhood Program Support Teachers and Mary Jo Ziegler, Title 1 Network Coordinator. The focus is on Literacy Skills and Strategies that support math concepts and mathematical thinking within your classroom and work with preschoolers. Discussion will center on your current practices, building in additional supports and planning for next steps. Site visits to support implementation can be included. Google folders and resources will be used to organize and share resources.

Participants can earn 1 grad credit or 15 hours of continuing education credit if they attend the first two sessions at a location. Participants can earn an additional credit if they attend the 3rd and 4th sessions at a location.
