

# BIG QUESTIONS for Young Minds BOOKSTUDY

Questions are powerful tools, especially in the classroom. Asking rich, thoughtful questions can spark young children's natural curiosity and illuminate a whole new world of possibility and insight. But what are "big" questions, and how do they encourage children to think deeply? With this

intentional approach—rooted in Bloom's Taxonomy—teachers working with children ages 3 through 6 will discover how to meet children at their individual developmental levels and stretch their thinking.

**Audience:** Early Childhood, Special Education Staff, Itinerant Teachers, Speech/Language Clinicians, and Collaborating Partners . . . anyone who wants to engage in the use of play for young children!
