Registration Questions:

Maryam Enterline

maryam.enterline@cesa2.org

Join us on Monday, April 16th from 9 to 3 to learn how to help your students understand their own learning through your understanding of the four formative practices:

1) Clarifying Learning

Making learning targets clear and letting students know how to gauge if they are successful

2) Eliciting Evidence

Gathering evidence to promote student thinking and elicit understanding of learning, errors, and misconceptions

3) Providing Feedback

Working with students to provide the information they need to understand problems and solutions better

4) Activating Learners

Giving students many opportunities to self-assess, set learning goals, and monitor their own progress

Learn strategies and techniques to implement the four formative practices. ***Participants should bring a current unit of study (including the assessments) with them to use as a foundation for their work in this workshop.***
