With the adoption of the Wisconsin Standards for Information and Technology Literacy (ITL), there is an opportunity to ensure integration of the content, skills, and technology-rich learning experiences into existing Wisconsin content standards. Come together with your local team to collaborate and create a crosswalk between the ITL and the WI standards. Walk away with a road map that will guide your teachers in creating curriculum units that focus on leveraging technology and information across all content areas, explore technology career pathways, and create new knowledge in the information age.

Day 1

Moving Day! (Unpacking and Repacking) June 14
Workshop Objectives

- Deeper understanding of content standards
- Designing a plan for effective instruction and assessment
- Rethinking a redesigning learning activities that promote the 5C's.

Day 2

Finalizing the Plan: June 15 (optional) is a collaboration/workday. Teams may attend day 2 and continue work on aligning technology standards to Wisconsin and Common Core Standards. The goal is for your team to be Future Ready by year 3 as required by WI DPI.
