

CESA #3 NWEA - MAP Data Analysis Training Tuesday, October 18, 2011

CESA #3 will be offering data analysis training for school districts who have done Fall testing with the NWEA-MAP assessment.

The training is scheduled for Tuesday, October 18th at the CESA #3 building in Fennimore. This training is designed to be a training of the trainers. Districts are asked to send a team of folks who will be trained to go back to the district and work with their teachers on the interpretation and application of their districts' student data.

The morning session (9:00-12:00) will focus on the basic MAP Reports that are available on-line for all staff after the fall testing window has been closed (Class Rosters, Teacher Reports, Class by RIT, Individual Student Reports, and Dynamic Reports).

The afternoon session (12:45-3:00) will focus on "Ordered Reports" that each district must order ahead of time from NWEA and place into a file that staff can access (pdf format is preferred). These reports are NOT an extra cost to the district. These reports focus on student growth analysis.
