Empathic**

Caregiver-Infant Attachment Through Attunement

January 22, 2018

9:00 am - 11:30 am

(Western Region Networking Meeting to follow at 12:00 pm)

CESA 10 Conference Center, Chippewa Falls

CARE Series: The first session being offered on January 22, 2019, will introduce what we hope to be a series (CARE) promoting social-emotional development and infant mental help within a parallel process. The first topic of the series is ***Caregiver-Infant Attachment Through Attunement***.

Topic One Description: Secure attachment is a foundation to healthy social emotional development. Caregivers must be attuned to their infants in order for this to occur. Using the lens of Infant Mental Health, we will explore ways in which we can promote and foster attachment through attunement in the parents and caregivers we coach every day. Leaders will discuss how they use the New-born Behavioral Observations (NBO) in their practices.

Agenda:

| | |
|----------|--------------------------------|
| 9:00 am | CARE Series Presentation |
| 11:30 am | Lunch |
| 12:00 pm | Western Region Network Meeting |
