

MEET & TEST DRIVE XELLO

In Fall 2019, Xello is coming to Wisconsin in a big way! And this spring, you can get an advanced preview of what Xello has to offer and try out the student experience for yourself.

Xello helps set every student up to succeed in high school and beyond with a discovery-based model that empowers them to create personalized plans through an immersive experience that builds essential self-knowledge and skills while exploring all future possibilities for success. We're thrilled to bring you the next evolution of our future-readiness solution—and we hope by the end of the session, you'll be as excited as we are!

This **half-day session** will help prepare you for your school district's move from Career Cruising to Xello.

Session Goals

- Introduce Xello and why it was developed
- Highlight key outcomes DPI and WI districts want to achieve with Xello
- Demonstrate how Xello supports those outcomes
- Ensure attendees know what to expect with the migration process
- Get hands-on and experience Xello like their students will!

Who Should Attend

Educators who will be using Xello with students in a classroom or counseling setting.

Format

Initial presentation to be followed by a hands-on workshop and discussion. Please bring a laptop if possible.

Topics Covered

- Introduction and overview of the student experience
- Xello's interactive lessons
- Course planning in Xello
- Requesting and sending transcripts
- Tracking student learning
- What's involved in migration (Spoiler Alert: It's really easy!)

We'll take questions throughout the session, and if there's anything you have questions about now, let us know and we'll be sure to cover it! You can send your questions to training@xello.world.
