## Training Goals:

1. Understand the holistic, integrated nature of the three child outcomes.
2. Utilize authentic assessment practices to gather information on child's functional behavior from parents and primary caregivers.
3. Use a child assessment tool to age-anchor child's functioning.
4. Participate as a team member to confidently rate a child using the Child Outcomes Decision Tree and Bucket List in the rating process.
5. Become aware of how the child outcomes data can be used to improve your program.
