Educators John Spencer and A.J. Juliani

knows firsthand the challenges

teachers face every day: School can be busy. Materials can be scarce. The creative process can seem confusing. Curriculum requirements can feel limiting. Those challenges too often bully creativity, pushing it to the side as an "enrichment activity" that gets put off or squeezed into the tiniest time block. We can do better. We must do better if we're going to prepare students for their future.

In LAUNCH, teachers will discover practical strategies for using design thinking in the classroom to engage, inspire, and empower students. Here are a few key takeaways:

- Student projects that focus on making, designing, and creating
- Fixing the brainstorming process
- Structuring project-based learning to unleash creativity
- Building creative confidence in the classroom
- Leading a maker movement without spending a lot of money
