### Workshop Description:

This workshop is provided for all educators, school leaders and support staff who have responsibility for managing and communicating student data results for use by teachers, school leaders, parents, and other interested stakeholders. The workshop will focus on building participant capacity to use the full range of tools available in WISEdash for Districts (AKA: "WISEdash Secure").

The session facilitators will provide a review of basic navigation routines, an overview of data sources available and basic data analysis tools. In addition, participants will receive detailed instruction and coaching for using more advanced tools including growth dashboards; snapshot tools; Dropout Early Warning System (DEWS) and College and Career Readiness Early Warning System (CCREWS); Cohort Manager; and Data Inquiry Journal tools. Time will be provided for guided practice using these tools to analyze your local data. You should consider attending this workshop if you have a basic familiarity with the WISEdash system and tools, but want to build your understanding and capacity for using these tools more effectively to guide school improvement and strategic planning efforts.
