Workshop Description:

WISEdash 101 is an opportunity to explore the what of WISEdash. This training will allow school and district teams to learn more about Wisconsin's Department of Public Instruction (DPI) many tools for school data analysis. This Level I training will lay the foundation for the advanced training offered on a separate date.

The two main objectives for this session will be to:

- Learn about how to understand and interpret the WI Report Card scores.

- Become familiar and comfortable navigating WISEdash, and learn about all of the different data applications available.

Hands on activities will guide participants through investigating basic data questions that emerge from report card analysis using WISEdash.
