**This series of workshops will support candidates through
Components 1, 2, 3, and/or 4 of the National Board Certification process.
Each workshop presented by a trained Candidate Support Facilitator.**

Workshop 1: Getting Started with the NB Process

Saturday, 9/28/19, 9:30 AM – 3:00 PM

Participants will learn how to navigate the NB process including forms, manuals, and dates. Registrants will be guided through the five core propositions and certificate-specific National Board for Professional Teaching standards. Participants will learn strategies to organize the work, standards-unpacking techniques, and the thinking for successful completion of each component. This workshop also provides time for candidates to connect with other candidates going through the National Board process.

Workshop 2: Planning Your Component 2 and Component 3 Entries

Saturday, 11/2/19, 9:30 AM – 3:00 PM

Participants will receive guidance in planning the lessons they choose for components 2 and/or component 3. We'll start by analyzing the questions in each component. Participants will then work independently with support to build a unit plan which will provide the writing opportunities needed to meet the requirements of their component.

Workshop 3: Writing for the National Board Process

Saturday, 1/25/20, 9:30 AM – 3:00 PM

Participants will learn how writing for the National Board process encompasses description, analysis, and reflection. Registrants will leave the workshop with resources that support continued work on Component 1 constructed response questions, Component 2 Student Work Analysis, and Component 3 Teaching Practice and Learning Environment entries.

Workshop 4: Writing, Studying, and Support Workshop

Saturday, 2/22/20, 9:00 AM – 4:00 PM

This workshop will provide a dedicated space and time for candidates to work on writing and studying for Components 1, 2, and 3. Candidates will have time to network with other teachers undertaking the National Board Certification process. A NB certified facilitator will be available for support and answer questions.

Workshop 5: Studying for Component 1

Saturday, 4/4/20, 9:30 AM – 4:00 PM

Participants will take a virtual tour through the testing experience, learn test taking strategies, and take practice test items. Participants will also have dedicated time to study.

Throughout the day, candidates can choose to work on their own in breakout rooms to study or collaborate. Wifi connectivity and printing will be available. Candidates will be assisted with setting up a Google account for file sharing if they do not already have one. Candidates should bring an internet-capable device. There will be limited numbers of laptops available on the workshop day.
