Workshop Description:

Join your science colleagues from across CESA 2 and do a deep dive into the Science Standards. A major goal for the day will be to collaborate with teachers from across CESA 2 to create common assessments that align to the standards, inform instruction, and engage students in deep science learning.

Let's get together and create some powerful science tools!

**Presenter:**

Kevin Anderson is a Science Consultant with DPI. His role is to support Wisconsin educators in improving their science programs. This being a time of transition for many district science programs, Anderson aims to help schools and educators design and implement high quality science instruction throughout the PK-12 years.
