

Design your way to School Change with STEM | Session #1

Oct 22, 2019 | 8:30 AM – 3 PM

A Starting Point for STEM Initiatives

- What does an effective ecosystem look like and how do we get students involved in STEM from under-represented populations?
- We will help you identify options and define STEM education for your district in grades K-6.

The Power of STEM Education

The requirement for STEM literacy goes beyond the traditional STEM occupations of scientist, engineer, and mathematician. The need for STEM-literate technicians and skilled workers in advanced manufacturing, logistics, management, and other technology-driven fields is growing exponentially.

Ready, Set, ENGAGE

We will identify and analyze Elementary STEM Curriculum(s) to support students and your community goals. We will use tools to evaluate which options and programs best align to your school goals and culture.

WHO SHOULD ATTEND?

Educators and administrators of students in grades K-6.

DETAILS

LOCATION

CESA 6 Conference Center
2300 State Hwy 44 | Oshkosh, WI 54904

REGISTRATION

- Register online at: cesa6cesa6.org/college-career
