

Blended & Virtual Learning

Implementing an innovative instructional design requires careful planning. It is critical that districts engage their communities and gain their buy-in before doing a new and innovative instructional design. The process of putting together an innovative instructional design takes a great deal of thought and planning.

Attending this one-day CESA workshop will be the launching point for districts to successfully use virtual learning to create quality learning experiences.

Tuesday, October 22, 2019 9:00 am - 3:00 pm

There are a variety of reasons a school would use Virtual Learning Time. These include, but are not limited to, snow or other inclement weather, professional development, widespread illness, and flooding. It is up to individual school districts to determine how many days they can effectively deliver instruction via Virtual Learning Time, including how many consecutive days.

**Registration Fee:
\$25 per person**
