

CAREER PATHWAYS are a series of connected education, training, and support strategies aimed at helping students achieve their own definition of success.

The NEW North region of Wisconsin (CESAs 6, 7 and 8) is facilitating the development of state-endorsed regional pathways in **ADVANCED MANUFACTURING** and **INFORMATION TECHNOLOGY**. If your district is already offering a sequence of courses, industry-recognized certifications, work experience, and college credit in these areas, then you have the capacity to offer your students a Regional Career Pathway built by your district Pathway Team.

Your **PATHWAY TEAM** should consist of:

- ACP Coordinator
- District Perkins Representative
- Career and Technical Education Coordinator
- Inspire Coordinator
- Work-based Learning Coordinator
- School Counselors

JOIN US for a two-part series to facilitate your district in creating and adopting state-endorsed regional pathways for your students. It is recommended that teams watch [Module 1](#) prior to Session 1. If your district plans to adopt the Regional State-Endorsed Career Pathway Model, district teams are required to attend both sessions at any of the CESAs by clicking on the workshop links below:

CESA 6

[Session 1 - November 4](#)

[Session 2 - December 4](#)
