# Leading For Equity

The Leading For Equity™ series is a signature service of the National Equity Project, working with leaders (both formal and informal) to develop their capacity to foster positive change on behalf of historically under-served students and families.

Learning sessions will focus on deepening participant awareness and understanding of key concepts and frameworks for examining and addressing racial disparities impacting the experiences and outcomes of students who have been historically marginalized within our school systems.

## Specific objectives include:

- Expanding ability to articulate an Equity Imperative
- Increasing ability to identify, analyze, and address issues of inequity
- Developing skills, strategies, and approaches to maintain leadership for equity
