

Virtual Learning Time

Implementing an innovative instructional design requires careful planning. It is critical that districts engage their communities to ensure there is a need for change and there are the necessary resources before doing a new and innovative instructional design.

There are a variety of reasons a school would use Virtual Learning Time. These include, but are not limited to, snow or other inclement weather, professional development, widespread illness, and flooding. It is up to individual school districts to determine how many days they can effectively deliver instruction with Virtual Learning Time, including how many consecutive days.

Your local CESA can support the assessment of district readiness and the development of an action plan to implement virtual learning time. Attending this one-day CESA workshop will be the **launching point** for districts to successfully use virtual learning to create quality learning experiences.

Your district team may be comprised of the following:

District Leadership, Director of Technology, Director of Curriculum & Instruction, Principals, Special Education, English Learner Lead, Educator/Instructional Coach, School Board, Community Members, PTO, Student Leadership, Communication Lead, Athletic Director

For more information, contact Tammy Moynihan at tmoynihan@cesa8.org.

November 20, 2019
9:00 AM-3:00 PM

CESA 8
223 West Park Street
Gillett, WI

Cost: \$25.00 per participant (A grant from DPI is helping to defray the registration fee)
