Integrating tech tools and new tech-related teaching approaches can be successful when supported by integration specialists/coaches.

*"Quality coaching offers critical support for trying out new approaches during that "awkward stage" just after initial exposure through training. It also helps teachers and staff persist in developing skill, judgment, and the artful and individualized use of new practices or programs." - [NIRN](#)*

The CESA 9 Technology Integration Specialist Network focuses on sharing cutting edge resources for technology integration, supporting coaches with professional learning planning, and the opportunity to collaborate with other coaches across our region.
