Workshop Description:

Presenters: Beth Clarke & Jacob Granahan

Are you looking to integrate STEAM activities into your classroom? Are you creating a space for innovative thinking and learning? Do you want students to engage in design and computational thinking experiences? This is the workshop for you! During this 3-day series you will tinker with and learn how to use resources that support STEAM learning (high and low tech), visit schools integrating STEAM principles and activities, and build application activities to get you started in your educational setting. Our success indicator will be your excitement and readiness to deepen and apply your STEAM learning.
