

Lights! Camera! Action! Video Modeling

October 4, 2011

Video modeling is being used to teach many skills and behaviors by watching video demonstrations and then imitating the behavior modeled. It is being used to teach social skills, communication, cognitive skills, self care and vocational skills. Not only is the video modeling an important tool for teaching a student, it is a valuable assessment and progress report tool as well as a valuable tool for self improvement and staff training.

- This session will share information, research, resources, and case examples to develop knowledge of video modeling.
- Participants will learn important strategies for successful implementation of video modeling in the classroom, in therapy, in the home and in the community.
- Participants will learn the tools necessary for using making video and using video on mobile devices.

Participants will have hands on experience to learn how to edit/crop/blend and publish video using Windows Movie Maker.

- Participants will learn about video formats and have hands on experience to learn how to convert formats for use on mobile devices.
