

# Top 10 Reasons to Use Studywiz

Studywiz Spark is a dynamic learning platform with unique tools and functionality

- 1 Ability for teachers to individualize instruction or dynamically organize teams of students for project-based learning.**  
*This can be facilitated by the teacher for within-class, within-building, or within district collaborations. Materials and tools can use existing teacher-developed resources or Web 2.0 resources.*
- 2 Multiple instructional tools that allow robust, engaged learning.**  
*Assignments, handouts, multi-content activity/lesson plans, document builder, iCal supported calendar.*
- 3 Various assessments for teachers to evaluate individual students, small groups, or the entire class.**  
*Options range from polls, to tests and quizzes, to individual learning plans.*
- 4 Communication/collaboration tools to promote interactive learning.**  
*eBulletins/announcements, secure messaging, safe chat, moderated blogs, discussions, galleries for collaborative interaction and peer review, and RSS feeds.*
- 5 Extended learning environments beyond traditional desktops and laptops.**  
*Mobile technologies, such as the iPod, iPod touch, iPhone, iPad, Netbooks, Android/Mobile 6.5 phones.*
- 6 Online and offline data access to user's personal or shared eLocker data storage.**  
*The Studywiz Mobile eLocker application developed for the iPad, iPod touch, and iPhone. Is available at no cost to users through Apple iTunes App Store.*
- 7 Integrated, quota-based, cross-platform file storage for teachers and students lets users access their own or shared documents via web interface or mountable WebDAV volume.**  
*Shared eLockers allow teachers to dynamically create shared storage spaces for students and classes and set limits on the length of time they are accessible.*
- 8 Choice of simplified or advanced interface allows users to start simply as they learn the platform and then move to advanced as they feel more comfortable.**  
*Flexible configuration of features and user interface elements provides a personalized look and feel, such as the ability to completely disable messaging or limit students to messaging their teachers and parents, but not peers.*
- 9 Dynamic roles allow a teacher or student to have different roles based on class/groups, concurrently in one login session.**  
*For example, teachers have authority for content creation/delivery in a class, but they may concurrently be students in a Professional Development group, or students may have permissions similar to teachers to create resources in a group, while still being a student in other classes.*
- 10 Integration and automation with existing IT infrastructure, including student data, as well as authentication with Directory Systems, such as Active Directory and Open Directory, and more.**  
*Scalable solution on Apple Xserve hardware, using commercial-grade web application services, such as WebObjects.*

**Studywiz** is a commercially developed and supported system that is used globally, which speaks to the adaptability of the product across geographical regions and educational systems. In addition to having a Studywiz customer in every region of the United States and other parts of the Americas, Studywiz is deployed in 27 countries.

Part of our philosophy is to include students, teachers and parents in a safe and secure community. This allows for extended learning opportunities beyond the walls of the traditional classroom.

Likewise, students can continue group collaboration with peers and communication with teachers outside of the constraints of a class period. Parents can oversee student work, schedules, and assignments and communicate with their students and their teachers. Even parents who travel or work full time can continue to stay proactively involved with their children's academic progress.

Studywiz offers a toolset that provides a learning platform for 21st century schools, including an award-winning mobile interface. The dynamic learnspace enhances curriculum through:

- Real-time feedback
  - Real-time assessment
  - Mobile applications
- Collaboration
  - Personalization
  - Interactive content

**SchoolOne**, is proud to be the exclusive US distributor for the Studywiz Spark software. SchoolOne is a full-service technology company with over 10 years' experience developing and implementing IT solutions specifically for schools. SchoolOne is an E-Rate certified, full-service provider that, in addition to its web-based Student Information System, provides a full range of IT services, including infrastructure, management, and support.

At SchoolOne, we know that no single product can provide the flexibility schools need, which is why we've paired our SIS and IT services with the world's leading education technology companies. SchoolOne has developed enviable partner ecosystems and is working on further integration of select partner products. In addition to Studywiz, our partners include Apple, Google, Microsoft, Promethean, NoteShare, and others.
