Hack Your Curriculum for Remote/Blended Inquiry Based Learning

DESCRIPTION: In this program, teachers will be supported to set up deep inquiry for a remote or blended learning environment.

Teachers will design an inquiry unit that is problem driven, and is focused around the tenets of exceptional learning. Additionally, teachers will develop tools, resources and frameworks to personalize the learning for each student in their class.

Through hands-on sessions, teachers will develop a plan for student learning that is structured, scaffolded and engages them in interactive experiences.

Teachers will be inspired with practical opportunities for documenting the inquiry based learning, helping to show student progression in meaningful ways and to ensure a seamless transition between various modalities for learning.

Intended Outcomes:

- Leverage human centered design, with various curriculum standards to drive deep inquiry
- Implementing the tenets of exceptional learning
- Infusing future ready skill and competency development
- Backwards planning
- Designing exceptional, innovative, personalized inquiry driven learning experiences for students within any subject, at any grade level in an online or blended setting
- Strategies for fueling student curiosity and interest and making thinking visible
